City seeks feedback about reintroducing vehicles to K Street

The City of Sacramento departments of Transportation and Economic Development invite residents to complete a Web-based survey to provide feedback on the K Street Vehicle Traffic Study. The survey results will be used by city staff and the project team to understand public sentiments about the idea and what features would be most important if the City went forward with a trial conversion.

To complete the survey, visit the project Web site at www.cityofsacramento.org/KStreetVehicleTraffic/. The non-scientific survey will remain active until Saturday, August 22 at 12 noon.

Residents and interested parties are also invited to attend a community meeting on Wednesday, August 26, from 5:30 to 7:30 p.m. A brief presentation by City officials and the project team will begin at 5:45 p.m. followed by questions and answers. A summary of survey results also will be relayed.

The community meeting will be held at the second floor of the California Association of Counties Conference Center at 1020 11th Street.

About the study

The K Street Vehicle Traffic Study project team is examining options for incorporating vehicle traffic to the K Street Mall between 8th and 12th streets. Currently, blocks are open exclusively to pedestrians and light rail. The study will analyze circulation and traffic, pedestrian and bicyclist patterns, and the potential for accommodating parking. The study will also include alternatives for all existing and necessary infrastructure.

In conjunction with the study, the city is also considering a pilot project to try opening two blocks of K Street to vehicles. The blocks from 8th to 10th streets or 10th to 12th streets are under consideration for the trial.

For more information about the study, visit the City of Sacramento Department of Transportation Web site at www.cityofsacramento.org/KStreetVehicleTraffic/.
